NOTICE TO WAUKON RESIDENTS
1ST AVENUE SE RECONSTRUCTION PROJECT
CONCRETE PAVING NOTICE

Schedule

Paving of **1st Avenue SE** is set to begin on **Tuesday, October 13th**.

There is always a chance that unforeseen obstacles and weather may arise during construction. Should paving not start on Tuesday, October 13th, the plan would be to pave on the first day suitable thereafter.

Driveways

MSA will mark out driveway curb cut locations with pink paint. These curb cuts will be marked on Monday, October 12th. The pink paint marks the location where your driveway will match into full-height curb. They are approximately 2 feet outside your actual driveway opening on each side. We ask that residents review the pink paint marks and bring up any questions to on-site personnel.

Paving and Access

The pave will be full-width resulting in a width of 28 feet from back-of-curb to back-of-curb. Paving of 1st Avenue SE will be completed in one day. The connections at each of the intersections of 2nd Street SE and 4th Street SE will be completed in the days that follow the 1st Avenue SE pave. This will result in the 1st Ave SE and 4th Street SE intersection being completely closed to traffic for approximately a week.

During the paving process, residents should plan not to have access to their driveways. Residents should park on a side street outside of the project limits. Another option is the northeast corner of the hospital parking lot off of E Main Street. See the map on the next page for potential parking locations highlighted in blue. Please note that 4th Street SE from E Main Street to 1st Avenue SE will not be available for on-street parking during the day of paving, but may be used for parking after that first day.

Residents impacted by this paving should begin parking in the recommended locations **on the evening of Monday, October 12th** until further notice.

Paving operations will begin as early as 7 AM with crews showing up and operating equipment as early as 6 AM.

As part of the paving process, the new concrete must be sawcut within a certain timeframe after concrete is placed. This timeframe can fall into the late hours of the night and early hours of the morning. If you hear sawing of concrete at odd hours of the day, please note that it must be completed to ensure that the concrete will not have issues with uncontrolled cracking. Residents are advised to close their windows throughout the paving process. Closed windows will help mitigate the noise and dust produced from concrete sawing.

As a reminder, do not walk on any freshly placed concrete, or modify/remove/play with any of the stakes on site. These are crucial to the contractor's ability to properly build the road.

Other

Trash pickup during the paving process will be as normal. Please move your trash receptacles down towards the roadway, and the Contractor will be responsible for removing the trash.

Residents are advised to relocate any large vehicles (campers, trailers, boats) they intend to use during the paving timeframe. It is also a good time to consider grocery shopping in advance of paving, while driveway access is still available.

If you have any questions or concerns regarding the 1st Avenue SE Reconstruction Project, please do not hesitate to contact Hunter Nix with MSA or City Hall. Thank you for your patience and cooperation as The City of Waukon, MSA, and Offset Construction work towards the completion of the project.
